1. Introduction

What is Paymint?

Paymint is a comprehensive Point of Sale (POS) system designed specifically for restaurants, cafes, and retail establishments. It streamlines your daily operations by providing an intuitive interface for processing sales, managing inventory, tracking employee performance, and generating detailed business reports.

Key Features

Feature	Description
Multi-Tenant Support	Connect multiple devices to a single restaurant account
Real-Time Sales Tracking	Monitor sales, orders, and revenue as they happen

Shift Management	Track employee shifts with automatic cash reconciliation
Inventory Control	Real-time stock deduction and low-stock alerts
Loyalty Program	Built-in customer rewards and points system
Multi-Language Support	Full English and Arabic (RTL) interface support
Comprehensive Reports	Detailed analytics with PDF export capability
Split Payments	Handle complex payment scenarios with ease

System Requirements

- **Device:** Android tablet or iPad (10" or larger recommended)
- **Internet:** Stable Wi-Fi connection required
- **Peripherals:** Compatible receipt printer, barcode scanner (optional)

2. Getting Started

2.1 Connecting to Your Restaurant

Before using the POS, you must first connect the app to your restaurant account.

[Insert Screenshot of Connect Restaurant Screen]

1. **Launch** the Paymint app on your device.
2. **Enter Restaurant ID** in the designated field (e.g., cafe-aroma).
3. **Enter Restaurant Password** provided by your administrator.
4. **Tap "Connect Restaurant"** to verify and establish connection.

Note: Once connected, the app remembers your restaurant and proceeds directly to the login screen on subsequent launches.

2.2 Logging In

Paymint offers two login methods:

Option A: Staff Selection (Recommended)

[Insert Screenshot of Who's Working Screen]

1. **Select Your Profile** from the list of staff members displayed on screen.

- 2. **Enter Your 4-Digit PIN** using the on-screen keypad.
- 3. **Wait for Verification** - the system will log you in automatically.

Option B: Traditional Login

[Insert Screenshot of Login Screen]

- 1. **Enter Username** in the username field.
- 2. **Enter Password** in the password field.
- 3. **Tap "Log In"** to access the system.

2.3 Starting Your Shift

After logging in, you will be prompted to manage your shift:

Scenario	Action Required
No active shift	Start a new shift by entering the opening cash amount
Your shift is active	Choose to resume your existing shift
Another user's shift is active	System will display a conflict notification

To Start a New Shift:

- 1. **Tap "Start Shift"** when prompted.
- 2. **Enter Opening Cash Amount** - count the cash in your drawer.
- 3. **Confirm** the amount to begin your shift.

[Insert Screenshot of Start Shift Modal]

2.4 Hardware Setup

Receipt Printer Setup

- 1. Navigate to **Settings > Your Restaurant**.
- 2. Scroll to **Printer Configuration**.
- 3. **Select Printer Type** (Bluetooth, Wi-Fi, or USB).
- 4. **Tap "Search for Printers"** to discover available devices.
- 5. **Select Your Printer** from the list.
- 6. **Print Test Receipt** to verify connection.

Barcode Scanner Setup

- 1. Enable Bluetooth on your POS device.
- 2. Put your barcode scanner in pairing mode.
- 3. Select the scanner from the Bluetooth devices list.
- 4. Once paired, the scanner will work automatically with the Sales Screen.

2.5 Password Recovery

If you forget your password:

1. Tap **"Forgot Password?"** on the login screen.
 2. An **Administrator Authorization** modal will appear.
 3. Request an admin to authorize the reset.
 4. Enter the **One-Time Password (OTP)** sent to you.
 5. Create a **New Password** and confirm.
-

3. Owner Dashboard (Enterprise Management)

The Owner Dashboard is your high-level control center for managing multiple establishments (nodes) across your business fleet.

3.1 Fleet Overview

When you log in as an owner, you are presented with the **Establishments** page. This is your "Fleet Inventory" view.

- **KPI Cards:** Quickly see your Total Inventory (number of stores), Active Nodes, and Trial Instances.
- **Search & Filters:** Find specific stores by name, ID, or type. Filter by subscription status (Active, Trial, Canceled, Expired) or business type (Restaurant, Cafe, Retail).
- **View Modes:** Toggle between a **Grid View** (visual cards with status indicators) and a **List View** (compact table for high-density management).

3.2 Managing Nodes

Each store in your fleet is treated as an independent node. - **Enter Dashboard:** Click on any establishment to open its specific management terminal. - **Manage Brands:** Organize your stores into brands for consolidated reporting and identity. - **Add New Node:** Use this to launch the onboarding process for a new location.

4. Getting Started: Onboarding a New Establishment

When adding a new store to your fleet, you will go through a 4-step professional onboarding process.

Step 1: Establishment Details

Enter the core legal and contact information for the new location. - **Name & Category:** Trade name and business type (Restaurant, Cafe, Retail). - **Contact:** Business phone and physical address. - **Currency:** Set the base currency for this specific node. - **Quick Setup (Duplicate):** You can accelerate setup by copying categories, products, and discounts from an existing establishment in your fleet.

Step 2: Subscription & Payment

Paymint offers a flexible subscription model. - **Trial Period:** New owners get a 7-day free trial for their first establishment. - **Payment Method:** Securely link a card for automated monthly billing. Existing owners can use their saved card on file. - **Transparency:** View clear breakdowns of trial end dates or immediate charges for additional nodes.

Step 3: Establishment Login Credentials

Create the unique credentials that staff will use to connect the POS app to this specific store. - **Establishment ID:** A unique identifier (e.g., downtown-cafe). - **Password:** A secure password shared with authorized staff.

Step 4: First Admin Profile

Create the primary administrator account for this location. - **Personal Details:** First and Last Name. - **Login:** Username and Password for the store's management interface.

5. The Dashboard (Store Level)

Once you enter a specific establishment's dashboard, you see the real-time operational metrics for that location.

[Insert Screenshot of Store Dashboard]

5.2 Key Metrics Explained

Metric	Description
Net Sales	Total revenue after discounts and refunds
Number of Orders	Count of completed transactions during current shift
Cash Sales	Revenue collected via cash payments
Card Sales	Revenue from credit/debit card transactions
Other Payments	Revenue from third-party services (Talabat, Careem, etc.)
Pay In / Pay Out	Summary of petty cash movements
Total Hours Worked	Cumulative hours worked during current shift
Cash Discrepancy	Any surplus or deficit detected during reconciliation

5.3 Dashboard Actions

- Refreshing Data:** - Pull down on the screen to refresh all metrics instantly.
- Cash Management:** - Tap **"Cash In"** to record cash added to the drawer. - Tap **"Cash Out"** to record cash removed from the drawer.
- Viewing Sales Trend:** - The chart displays hourly sales performance. - Helps identify peak selling times for staffing decisions.

6. Daily Operations

6.1 Processing a Sale (Cash/Card)

[Insert Screenshot of Sales Screen]

Step-by-Step: Processing a Basic Sale

1. **Navigate to Sales Screen** using the bottom navigation bar.
2. **Select Category** from the left sidebar or top category bar.
3. **Tap Products** to add them to the order.
4. **Review Order Summary** in the right panel.
5. **Tap "Checkout"** when the order is complete.

[Insert Screenshot of Checkout Screen]

Accepting Cash Payment

1. Complete steps 1-5 above.
2. **Select "Cash"** as the payment method.
3. **Enter Amount Tendered** using the on-screen keypad.
4. System calculates and displays **Change Due**.
5. **Tap "Complete Sale"** to finalize.
6. **Give Change** to customer and hand over receipt.

Accepting Card Payment

1. Complete steps 1-5 above.
2. **Select "Card"** as the payment method.
3. **Choose Card Type** (Visa, Mastercard, American Express, etc.).
4. Process payment on your card terminal.
5. **Tap "Complete Sale"** once card transaction is approved.

Adding Notes to Items

1. After adding an item, **tap the item** in the order summary.
2. **Tap "Add Note"** or the pencil icon.
3. **Enter Special Instructions** (e.g., "No ice", "Extra spicy").
4. **Tap "Save"** to attach the note.

 **Tip:** Items with notes display a visible indicator to ensure kitchen staff don't miss customizations.

Using Add-ons/Modifiers

[Insert Screenshot of Add-on Modal]

1. **Tap a product** that has available add-ons.
2. The **Add-on Modal** appears automatically.
3. **Select Required Options** (e.g., size, milk type).
4. **Select Optional Add-ons** (e.g., extra shot, whipped cream).
5. **Tap "Add to Order"** to include the customized item.

Split Payment

For customers paying with multiple methods:

1. During checkout, **tap "Split Payment"**.
2. **Choose Split Type:**
3. **Split by Amount:** Enter custom amounts for each payment method
4. **Split by Item:** Drag and drop items to separate payments
5. **Process Each Payment** separately.
6. **Complete Sale** when all payments are collected.

[Insert Screenshot of Split Payment Modal]

Holding an Order

To save an order for later:

1. **Tap the "Hold" button** (pause icon) in the order panel.
2. **Enter a Nickname** for the order (e.g., "John - Table 5").
3. **Tap "Hold Order"** to save.
4. The order syncs to the server and is visible to all staff members.

To Resume a Held Order:

1. Navigate to **Notifications Screen**.
2. Find the held order in the list.
3. **Tap to Resume** the order.
4. Continue processing as normal.

6.2 Applying Discounts & Coupons

[Insert Screenshot of Discount Selection]

Applying a Preset Discount

1. With items in your order, **tap "Discount"** in the order panel.
2. **Select Discount Type** from available options:
3. Percentage discounts (e.g., 10% off)
4. Fixed amount discounts (e.g., \$5 off)
5. Special promotions
6. **Tap "Apply"** to add the discount.
7. The **discount is reflected** in the order total.

Applying Item-Level Discount

1. **Tap an item** in the order summary.
2. **Select "Apply Discount"** from the item menu.
3. **Choose Discount** to apply to that specific item only.
4. **Confirm** the discount application.

Using the Loyalty Program

[Insert Screenshot of Loyalty Modal]

Enrolling a New Customer:

1. **Tap "Loyalty"** button on the Sales Screen.
2. **Tap "New Customer"**.
3. **Enter Customer Name** and **Phone Number**.
4. **Tap "Register"** to create the account.

Applying Loyalty Points:

1. **Tap "Loyalty"** button.
2. **Search** for the customer by name or phone.
3. **Select Customer** from search results.

4. View available **Points Balance** and **Rewards**.
5. **Select Reward** to redeem (if eligible).
6. **Tap "Apply"** to use points toward purchase.

Note: Points are automatically earned on each purchase and tracked in the customer's profile.

6.3 Handling Returns & Refunds

[Insert Screenshot of Reports Screen - Order History]

Processing a Full Refund

1. Navigate to **Reports** using the bottom navigation.
2. Select the **"Orders"** tab to view order history.
3. **Search** for the order using:
 4. Order number
 5. Date/time filters
 6. Customer name (if loyalty was used)
7. **Tap the Order** to view details.
8. **Tap "Refund"** button.
9. **Enter Refund Reason** (required field).
10. **Request Admin Authorization** if required by your settings.
11. **Confirm Refund** to process.

[Insert Screenshot of Refund Modal]

Processing a Partial Refund

1. Follow steps 1-4 above.
2. **Tap "Partial Refund"** option.
3. **Select Items** to be refunded.
4. **Enter Reason** for the partial refund.
5. **Confirm** to process the partial amount.

Refund Authorization

Depending on your establishment's settings, refunds may require admin approval:

1. When prompted, an **Admin Selection Modal** appears.
2. **Select an Administrator** from the list.
3. Admin must **enter their PIN** to authorize.
4. Once authorized, refund processes automatically.

Important: All refunds are logged in the Activity Log for audit purposes.

6.4 Managing Inventory (Categories & Products)

Manage your menu structure and groupings through **Settings > Menu Management**.

6.4.1 Managing Categories

Categories are the foundation of your menu organization.

- **Creating Categories:** Navigate to Categories and tap "New Category". Assign an icon and name.
- **Popularity Tracking:** See which categories have the most products assigned.
- **Structure:** You can reorder categories to control how they appear on the sales screen.
- **Deletion Rules:** To maintain data integrity, you cannot delete a category that still contains active products. You must reassign or delete the products first.

6.4.2 Adding a New Product

1. Navigate to **Dashboard > Products** (or through a Category view).
2. **Tap "Add Item"** or "New Product".
3. Complete the product form:

Field	Description
Product Name	Display name shown on Sales Screen
Price	Selling price in your currency
Description	Optional product description
Category	Assign to existing or new category
Cost Price	Purchase cost for profit calculations
SKU/Barcode	Optional identifier for scanning
Product Image	Upload photo (tap camera icon)

1. **Enable Stock Tracking** (toggle) if tracking inventory levels.
2. **Set Initial Stock** quantity if tracking is enabled.
3. **Tap "Save"** to create the product.

[Insert Screenshot of Add Item Form]

6.4.3 Editing an Existing Product

1. Navigate to **Settings > Product Management**.
2. **Find the Product** using search or scrolling.
3. **Tap the Product** to open edit mode.
4. **Modify Fields** as needed.
5. **Tap "Save"** to apply changes.

6.4.4 Managing Product Categories (Deep Dive)

1. Navigate to **Settings > Product Management**.
2. **Tap "Categories"** tab.
3. To add: **Tap "Add Category"** and enter name.
4. To edit: **Tap existing category** and modify.
5. To reorder: **Drag and drop** categories.

6.4.5 Managing Add-ons (Attributes)

Navigate to **Settings > Add-Ons (Attributes)**.

[Insert Screenshot of Attributes Screen]

1. **Tap "Add Group"** to create a new add-on group.
2. **Enter Group Name** (e.g., "Milk Type", "Size").
3. **Configure Settings:**
4. **Required:** Customer must select an option
5. **Multi-Select:** Allow multiple selections
6. **Add Options** within the group (e.g., "Oat Milk +\$0.50").
7. **Assign to Products** that should use this add-on group.
8. **Tap "Save"** to apply.

6.4.6 Updating Stock Levels

Navigate to **Settings > Stock Management**.

[Insert Screenshot of Stock Management Screen]

1. **Find the Product** using search or scrolling.
2. **Tap the Product** to open stock editor.
3. **Adjust Quantity:**
4. Enter new stock count, OR
5. Use +/- buttons to increment/decrement
6. **Enter Reason** for adjustment (optional but recommended).
7. **Tap "Save"** to update inventory.

Tip: Stock is automatically deducted when items are sold. Low-stock alerts appear when quantities fall below thresholds.

7. Admin Functions

7.1 Accessing Reports

Navigate to **Reports** using the bottom navigation bar.

[Insert Screenshot of Reports Screen]

Available Report Types

Report Tab	Description
General Reports	Overall sales summaries and financial metrics
Item Reports	Individual product performance analysis
Order History	Searchable list of all transactions

Filtering Reports

1. **Tap the Filter Icon** to open filter options.
2. **Select Date Range:**
3. Today
4. Last 7 Days
5. Last 30 Days
6. This Month
7. Custom Range
8. **Apply Additional Filters:**
9. Employee
10. Payment Method
11. Card Type
12. Order Status (Completed/Refunded)
13. Discount Used
14. **Tap "Apply"** to filter results.

[Insert Screenshot of Report Filters]

Peak Hours Analysis

The **Peak Hours Chart** shows order volume by hour:

1. Navigate to Reports.
2. View the hourly bar chart.
3. Identify your busiest times for staffing optimization.

Top Selling Items

1. Navigate to Reports.
2. View **"Top Selling Items"** section.
3. Toggle between **Today**, **Week**, or **Month** views.
4. Use insights for inventory planning and menu optimization.

Exporting Reports

To Export as PDF:

1. Open the desired report.
2. **Tap "Export PDF"** button.

3. Choose save location or share directly.

To Email Report:

- 1. Open the desired report.
- 2. **Tap "Email"** button.
- 3. Enter recipient email address.
- 4. **Tap "Send"** to deliver report.

To Print Report:

- 1. Open the desired report.
- 2. **Tap "Print"** button.
- 3. Select your connected printer.
- 4. **Confirm** to print.

7.2 Managing Employee Permissions

Navigate to **Settings > Employee Management** (Admin Only).

[Insert Screenshot of Employee Management Screen]

Adding a New Employee

- 1. **Tap "Add Employee"** button.
- 2. Complete the employee form:

Field	Description
Name	Employee's full name
Email	Login email address
PIN	4-digit PIN for quick login
Role	Admin or User

- 1. **Assign Permissions** (for User role):
- 2. Dashboard access
- 3. Reports access
- 4. Settings access
- 5. Inventory management
- 6. Employee management
- 7. **Tap "Save"** to create the account.

Editing Employee Permissions

- 1. **Find the Employee** in the list.

- 2. **Tap** to open their profile.
- 3. **Modify Permissions** as needed.
- 4. **Tap "Save"** to apply changes.

Deactivating an Employee

- 1. **Find the Employee** in the list.
- 2. **Tap** to open their profile.
- 3. **Toggle "Active"** switch to OFF.
- 4. **Confirm** the deactivation.

Note: Deactivated employees cannot log in but their historical data is preserved.

7.3 Closing the Shift (Z-Report)

The Z-Report summarizes all transactions for the shift and reconciles the cash drawer.

[Insert Screenshot of End Shift Modal]

Step-by-Step: Ending Your Shift

- 1. Navigate to **Dashboard**.
- 2. **Tap "End Shift"** button.
- 3. The **Shift Summary** appears displaying:
- 4. Total Sales
- 5. Cash Sales
- 6. Card Sales
- 7. Other Payments
- 8. Expected Cash in Drawer
- 9. Pay In/Pay Out transactions
- 10. **Count Physical Cash** in your drawer.
- 11. **Enter Counted Amount** in the field.
- 12. System calculates any **Discrepancy** (surplus or deficit).
- 13. **Tap "Close Shift"** to finalize.

Understanding Cash Discrepancy

Scenario	Meaning	Action
Surplus	More cash than expected	Investigate source of extra funds
Deficit	Less cash than expected	Report to manager immediately
Balanced	Cash matches expected amount	Shift closes normally

Important: Cash discrepancies are logged and reported to owners via the Paymint Owner app.

Printing the Z-Report

After closing your shift:

- 1. A prompt appears to **print the Z-Report**.
- 2. **Tap "Print"** to generate the receipt.
- 3. The report includes:
- 4. Shift start/end times
- 5. Total transactions
- 6. Payment breakdown
- 7. Cash reconciliation details
- 8. Operator name

7.4 Activity Log

Navigate to **Settings > Activity Log** (Admin Only).

[Insert Screenshot of Activity Log Screen]

The Activity Log tracks all system actions:

Activity Type	Examples
Product Changes	Items added, edited, or deleted
Employee Actions	Login, logout, permission changes
Order Activities	Sales, refunds, voids
Settings Changes	Configuration modifications
Cash Operations	Pay in, pay out, shift closures

Filtering the Activity Log

- 1. **Select Date Range** to narrow results.
- 2. **Filter by User** to see specific employee actions.
- 3. **Filter by Type** to see specific action categories.
- 4. **Export to PDF** for record-keeping.

7.5 Restaurant Settings

Navigate to **Settings > Your Restaurant**.

[Insert Screenshot of Your Restaurant Screen]

Customization Options

Setting	Description
Restaurant Name	Displayed on receipts and app header
Logo	Brand image for receipts and interface
Theme Color	Choose Green, Yellow, or Blue
Dark Mode	High-contrast mode for low-light environments
Working Hours	Set operating hours
Farewell Message	Custom message on receipts
Currency	Set local currency symbol
Tax Rate	Configure default tax percentage

Changing Theme

1. Navigate to **Settings > Your Restaurant**.
2. Find **"Theme"** section.
3. **Select Color Theme:**
4. Green (Default)
5. Yellow
6. Blue
7. Changes apply immediately.

Language Settings

1. Navigate to **Settings > Language**.
2. **Select Language:**
3. English
4. Arabic (includes RTL layout support)
5. **Restart App** if prompted for full effect.

8. Troubleshooting

8.1 Common Error Messages

Error Message	Cause	Solution
"Connection Failed"	No internet or server unavailable	Check Wi-Fi connection; try again in a few minutes
"Invalid Credentials"	Incorrect username or password	Verify login details; use "Forgot Password" if needed
"Session Expired"	Login session timed out	Log in again with your credentials
"Printer Not Found"	Printer disconnected or off	Check printer power and connection; re-pair if needed
"Shift Already Active"	Another user has an open shift	Contact the active user to close their shift, or request admin override
"Insufficient Stock"	Item quantity is zero	Update stock levels before selling
"Payment Processing Failed"	Card terminal issue	Retry transaction; check card terminal connection
"Admin Authorization Required"	Action requires admin approval	Request an administrator to authorize

8.2 Printer Issues

Printer Not Connecting:

1. Verify printer is powered ON.
2. Check Bluetooth/Wi-Fi is enabled on both devices.
3. Ensure printer is within range.
4. Navigate to **Settings > Your Restaurant > Printer**.
5. **Tap "Search for Printers"** to rediscover.
6. Select printer and test connection.

Receipt Not Printing:

1. Check printer has paper loaded.
2. Verify printer is selected in settings.
3. **Print Test Receipt** from settings to verify.
4. Restart printer if issue persists.

Print Quality Issues:

1. Check paper is loaded correctly (thermal side facing print head).
2. Clean print head with appropriate cleaning card.
3. Replace paper roll if faded or wrinkled.

8.3 Connection Issues

"Server Connection Failed":

1. Check device is connected to Wi-Fi.
2. Verify internet is working (try loading a website).
3. Restart the Paymint app.
4. Restart your Wi-Fi router if needed.
5. Contact support if issue persists.

Slow Performance:

1. Close unused apps running in background.
2. Clear Paymint app cache (Settings > Apps > Paymint > Clear Cache).
3. Restart the device.
4. Ensure sufficient device storage available.

8.4 Payment Issues

Card Payment Failed:

1. Verify card terminal is connected and powered.
2. Ask customer to retry with a different card.
3. Check card terminal has network connection.
4. Process as cash payment if card system is down (with customer consent).

Split Payment Calculation Error:

1. Verify all amounts are entered correctly.
2. Ensure total of split amounts equals order total.
3. Cancel and restart split payment if needed.

8.5 Shift Issues

Cannot Start Shift:

1. Check if another user has an active shift.
2. Contact the active user to end their shift.
3. If user is unavailable, request admin to force-close the shift.

Shift Data Not Showing:

1. **Pull down to refresh** the Dashboard.
2. Verify you are logged into the correct account.
3. Check shift is actually started (not just logged in).

8.6 Contacting Support

If issues persist after troubleshooting:

1. Navigate to **Settings > About Us > Contact Support**.
2. Describe the issue in detail.
3. Include:
 4. Error message (exact text)
 5. Steps that caused the error
 6. Device model and OS version
 7. Time the issue occurred
8. Submit the support request.

Support Contact: - Email: support@paymint.io - In-App: Settings > Contact Support

9. Appendix

9.1 Keyboard Shortcuts (Tablet with Keyboard)

Shortcut	Action
Enter	Confirm dialog/Complete action
Escape	Cancel/Close modal
Tab	Navigate between fields

9.2 Glossary

Term	Definition
Shift	A work session from clock-in to cash-out
Z-Report	End-of-shift summary with cash reconciliation
Pay In	Cash added to drawer (not from sales)
Pay Out	Cash removed from drawer (not refunds)
Held Order	Saved order to be completed later

Add-on	Product modifier or customization option
Loyalty Points	Customer rewards earned from purchases
Discrepancy	Difference between expected and actual cash
SKU	Stock Keeping Unit - unique product identifier
RTL	Right-to-Left (Arabic language layout)

9.3 Receipt Information

Standard receipts include:

- Restaurant name and logo
- Date and time
- Order number
- Items with prices
- Add-ons and modifications
- Subtotal
- Tax amount (with percentage displayed, e.g., "Tax (16%)")
- Discounts applied
- Total amount
- Payment method
- Change given (for cash)
- Cashier name
- Farewell message

9.4 Security Best Practices

1. **Never share your PIN** with other employees.
2. **Log out** when leaving the POS unattended.
3. **Report suspicious activity** to management immediately.
4. **Change password** if you suspect it's been compromised.
5. **Close your shift** before leaving for the day.
6. **Count cash carefully** during shift reconciliation.
